

ATCP WHITEPAPER V.1.0

The information contained here is fully prepared for the competition.

INTRODUCTION

There are several issues that arise in the coin era: It's extremely complicated, and most people don't have the time or prior knowledge to act safely and effectively. ATCP comes into play here. The goal of ATCP is to bring you closer to the coin in a simple and understandable way, so that it can be widely adopted.

People can now interact with both the virtual and physical worlds thanks to ATCP Metaverse, one of the most fascinating technologies in the cryptosphere.

WHAT IS BLOCKCHAIN?

The blockchain system is not linked to any center or individual. The blockchain system is made up of devices that have been adapted to it. These anonymous devices carry out the transactions, which are completely immune to outside interference.

Instead of collecting data from other Internet systems in a single location, blockchain distributes it to multiple devices or computers. As a result, it prevents any outside interventions from being made on these data.

The blockchain database is accessible to all, not just its users. As a result, carrying out its control is transparent. Anyone can control transactions registered in a block, wallet addresses, Transaction ID (shipping code), and amounts.

Blockchain technology The blockchain records the wallet addresses of all users as the transaction is completed, and repetitive transactions are avoided.

HOW BLOCKCHAIN WORKS?

Provision out a block that creates new blocks connected to each other for each operation performed when a cryptographic blockchain has blocks and transactions in the network, and each new block incorporates the codes of the previous blocks.

An inter-block chain decays as this process is repeated. When one of the blocks is finished, it generates a "Hash" code, and the next block begins to generate a new block based on this "Hash." "code. Because of this "Hash" "The creation of a duplicate block has been prevented by code.

Transactions involving the transfer of assets via blockchain are both cheaper and faster than transactions involving banks. The blockchain network processes the transmission that you initiate from your wallet. A Transaction ID code is generated for your shipment that contains your wallet address, recipient wallet address, and amount details.

You can track your shipment using this code. You can find all the details of your shipment on the blockchain network using the Transaction ID code. Details include the recipient wallet, sender wallet, amount, number of confirmations received, block it is in, and the fee fee you will pay.

What Are the Benefits of a Blockchain System?

The benefits of the blockchain system are broadly classified into five categories:

*Because it is not linked to any center or person, transactions can be completed safely, cheaply, and quickly.

*The ability to control all transactions made on the blockchain prevents system interference and fraud.

*Keeping all blockchain network data scattered across multiple devices prevents all outside attacks and provides a secure system.

*Because it is based on a mathematical formula and operates automatically, there is no room for error.

*The fact that the blockchain system's devices are dispersed prevents any interference with the system and provides transparency.

What exactly is Binance Smart Chain?

Binance Smart Chain, abbreviated BSC, is an innovative solution for introducing interoperability and programmability on Binance Chain. It uses a system of 21 validators leveraging the Proof of Staked Authority or PoSA consensus, thereby enabling lower fees and reduced block times.

The best way to understand the use of Binance Smart Chain app is an overview of the underlying design principles. As a matter of fact, the design principles for BSC tell a lot about how it works and the value of its functionalities. Here are some of the notable highlights in the design principles of BSC.

- Ethereum Compatibility
- Standalone Blockchain
- Native Cross-Chain Communication
- Consensus and Governance Associated with Staking

What is PancakeSwap?

PancakeSwap is the premier decentralized exchange of Binance Smart Chain founded in 2020 by the Binance exchange. PancakeSwap provides its users with a very simple and practical way to use it. Users can use their own wallets and personal keys to conduct transactions on the system. It is a platform for barter transactions that do not require the use of an intermediary. It provides numerous opportunities to its investors. Smart contracts are supported by the BSC network. This ensures both safety and functionality. Even if the Binance network is shut down, the Binance Smart Chain will continue to operate normally.

What exactly is ATCP Token?

ATCPAD is a token created on Binance Smart Chain. It was named ATCP (ATCPAD) in which originally stood for income. Our ecosystem includes of Metaverse, Exchange Platform, Prediction Contests, NFT Market, and Share Pools where you can earn a significant amount of money. It enables you to transact on the industry's best exchanges.

Here is the ATCP Token Specifications

Network : Binance Smart Chain

Total Supply : 1.000.000.000

ROADMAP

FIRST STAGE:

- *Token contract creation on BinanceSmart-Chain.
- *Creating social media channels
- *Marketing is used to create the initial community.

SECOND STAGE:

- *Website and pre-sale launchpad will be online.
- *Pre-sale to members of the community.
- *Listing day will be heavily promoted.

THIRD STAGE:

- *Large-scale marketing will expand
- *Official listing on a top-20 cryptocurrency exchange.
- *The app's first trailer and sneak peek.

FOURTH STAGE:

- *Official listing announcement on a leading cryptocurrency exchange
- *Marketing on a grand scale for the top-tier listing.

*Listing on a premier cryptocurrency exchange

What are the utilities of ATCPAD?

ATCP is the token that empowers the entire ATCP ecosystem. Its main utilities are: participating the IGOs and INOs hosted at ATCP, staking or farming to earn passive income, get free incubation tokens via the ATCP staking feature and use it for travel expenses and bookings at The ATCP team is constantly working to bring more relevant utilities to ATPAD

Access to Leading Projects As a launchpad and incubator we're constantly searching for the best upcoming games, NFTs and metaverses projects for our holders to invest. Projects Due Diligence We do the hard work of checking if the project is worth investing in, meeting the team and deeply analyzing its whitepaper prior to the IGO. Purchase the tokens and NFTs early Get the advantage of pre-launch purchasing of tokens and NFTs of the projects and the listing price prior to everyone. Stake and Farm for Passive Income Holders can get double rewards by staking and farming ATCP and also get free tokens from our incubated projects via the ATCP Staking Feature.

Investment packages yearly

Reference packages are for Reference earnings. 10 USD Yearly 100 USD

1 Yearly %5

3 Yearly %8

5 Yearly %10

3 Winning Methods

1 Interest of the investor when buying any package 2 Investor's monthly earnings 3 Percentage of commission held when withdrawing

Gain depths

10% 5% 3% 1%

--Every 1000 USD of atc coin you keep in your wallet earn 1 ticket in return

1st place 20% 2nd place 10% 3rd place 5% other 7 places 15% in total Getting referrals 35%
1st hat 20% 2nd hat 10% 3rd hat 5% shield gain 15%

With internal transfer coin conversion and withdrawal commission
Example: Internal transfer 3 %, conversion 2%, withdrawal 20%

Referral earnings from all commissions and ticket sales A certain -% of the ATCP you stake in the balance to win a gift ticket,
refer to the above. Example: Monthly 1%

Reference earnings of a certain % of the money you earn

\$10 monthly, \$100 yearly, \$1000 indefinitely backofice to get referral earnings

Winners of the guess receive a 50% pool bonus.

Bonus Reference Gain

1st place 20% 2nd place 10% 3rd place 5% other 7 places 15% in total

Getting referrals 35%

1st place 20% 2nd place 10% 3rd place 5% place gain 15%

The progress of the competition will be as follows:

*The data of everyone who will participate in the Bitcoin contest will be clearly and transparently displayed on the main screen.

*The teams of all people in the marketing area will be visible on everyone's panel.

*There will be an instant withdrawal.

* The names of the 10 winners will be announced on the main screen after closing at night.

*The Bitcoin Prediction Contest will work together with ATCP from the year 2023.

ATCP total supply-token: 1.000.000.000
